

What our customers say about us...

"We had a house with a heating system that was unreliable, noisy and very difficult to control. Also the new shower didn't get enough water. Advance Heating have ironed out all of these problems and we are stunned to find that our 500 year old farmhouse's heating now operates as smoothly as that of a boutique hotel."

A. J., Solihull

"We were very keen to introduce solar heating to our household without making it complex or costly. Advance Heating gave us an affordable, reliable system which enables us to turn off our gas boiler from April to October."

J. R., Coventry

"Unbeknown to us, our Viessmann central heating boiler had been installed to work reliably but not fuel efficiently. Advance Heating quickly spotted that unnecessary equipment had been fitted, making the system over complex. They simplified the system and, as a result, we are now saving £80 per month on our fuel bills."
